

PRESS RELEASE

Basel, Switzerland, July 4th, 2019.

Clinerion partners with 2 GL Outsourcing to bring patients and hospitals in Serbia, and Bosnia and Herzegovina quicker access to next-generation medical treatments.

2 GL Outsourcing will support Clinerion in expanding the coverage of the Patient Network Explorer platform to patients and hospitals in Serbia, and Bosnia and Herzegovina, who will be matched to leading-edge, sponsored, international clinical trials, accelerating their access to medical innovations.

2 GL Outsourcing is a dynamic and highly flexible pharmaceutical and clinical contract research and outsourcing organization providing a full range of professional services for the setting up and support of clinical research and development projects. 2 GL's scope of operations covers the territories of Serbia, Croatia, Slovenia, North Macedonia, Montenegro and Bosnia and Herzegovina. The company also has partnerships in Bulgaria, Hungary, Russia and Kazakhstan.

With this partnership, 2 GL will support the expansion of the network of partner hospitals on the Patient Network Explorer platform to the countries 2 GL covers, leveraging its clinical research ecosystem in the region. In addition, 2 GL will also support the start-up and conducting of trials at sites joining the Clinerion network.

Separately and in combination, Clinerion and 2 GL's services will accelerate access for patients and hospitals to next-generation medical treatments. Patients in the region will become more visible to sponsors for trial recruitment, and hospitals in the region will become better placed to run clinical trials. This ultimately accelerates drug launch.

Patient Network Explorer matches patients from Clinerion's global network of hospitals to clinical trials run by pharmaceutical sponsors. The system is based on de-identified EHR data, unlinked from any identifiers, protecting patient privacy.

"With Patient Network Explorer, the selection of centers, patients and researchers in the region for international, sponsored trials will greatly accelerate. This is definitely the most important benefit of co-operating with Clinerion," says Zoran Aćimović, CEO of 2 GL Outsourcing. "At the same time,

our team of highly skilled staff is qualified to respond very quickly to the high-quality requirements of emerging projects which are very demanding. This relieves the client and their human resources of time- and energy-consuming tasks, which usually has a favorable effect on the client's business."

"Clinerion is working hard to bring medicines quicker to patients around the world, both by facilitating the matching of trials to patients, and by accelerating drug approvals," says Ian Rentsch, Clinerion CEO. "2 GL offers a great network which can support the expansion of our coverage in the region, as well as the right, professional services to conduct clinical trials to the highest levels of quality."

About Clinerion

Clinerion accelerates clinical research and medical access to treatments for patients. We use proprietary technologies for analysis of patient data from our global network of partner hospitals. Clinerion's Patient Network Explorer radically improves the efficiency and effectiveness of clinical trial recruitment by offering data-driven protocol optimization, site feasibility evaluation and real-time patient search and identification to match patients to treatments. Our technology solution provides real-world evidence analytics for medical access. Clinerion facilitates the participation of partner hospitals in leading-edge, industry-sponsored trials and time savings in patient recruitment. We create innovative and disruptive fit-for-purpose solutions which enable pharmaceutical companies to shorten patient recruitment and save costs by streamlining operations and leveraging strategic intelligence. Clinerion's proprietary Big Data analytics technologies leverage real-time data from electronic health records which comply with international patient privacy and data security regulations. Clinerion is a global data technology service company headquartered in Switzerland.
