

## **PRESS RELEASE**

Basel, Switzerland, March 16<sup>th</sup>, 2020.

### **Clinerion gains ISO 27001:2013 certification.**

**Clinerion has gained ISO 27001:2013 certification, the international standard that describes best practice for an information security management system (ISMS).**

ISO 27001:2013 is a standard set by the International Organization for Standardization (ISO), the independent, non-governmental international organization of national standards bodies. ISO 27001:2013 is the international standard that describes best practice for an information security management system (ISMS). This International Standard can be used by internal and external parties to assess an organization's ability to meet the organization's own information security requirements.

To quote the ISO:

"ISO/IEC 27001:2013 specifies the requirements for establishing, implementing, maintaining and continually improving an information security management system within the context of the organization. It also includes requirements for the assessment and treatment of information security risks tailored to the needs of the organization."

"The information security management system preserves the confidentiality, integrity and availability of information by applying a risk management process and gives confidence to interested parties that risks are adequately managed."

Clinerion was assessed by and received ISO 27001:2013 certification from the certification organization DSR.

"We are very pleased to receive this certification, which reflects the fact that Clinerion's information security management system is part of and integrated with our processes and overall management structure," says Ian Rentsch, CEO of Clinerion. "For Clinerion, information security is considered in the design of processes, information systems, and controls. Our implementation of our information security management system can be scaled in accordance with the needs of the organization."

## About Clinerion

Clinerion accelerates clinical research and medical access to treatments for patients. We use proprietary technologies for analysis of patient data from our global network of partner hospitals. Clinerion's Patient Network Explorer radically improves the efficiency and effectiveness of clinical trial recruitment by offering data-driven protocol optimization, site feasibility evaluation and real-time patient search and identification to match patients to treatments. Our technology solution provides real-world evidence analytics for medical access. Clinerion facilitates the participation of partner hospitals in leading-edge, industry-sponsored trials and time savings in patient recruitment. We create innovative and disruptive fit-for-purpose solutions which enable pharmaceutical companies to shorten patient recruitment and save costs by streamlining operations and leveraging strategic intelligence. Clinerion's proprietary Big Data analytics technologies leverage real-time data from electronic health records which comply with international patient privacy and data security regulations. Clinerion is a global data technology service company headquartered in Switzerland.
