

CLINERION
clinical research solutions

Season's Greetings from Clinerion (scroll down for your present)!

As the year draws to a close, we would like to send you our warmest greetings, and thanks for the support you have given us in 2016!

We look back to a busy year, full of great opportunities to interact with you and discuss your needs for real-time, EHR-based patient recruitment to accelerate drug development. We consolidated our network of connected hospitals and kicked off its next round of expansion. We started to offer new services for Market Access and Real-world Evidence.

And we look forward to a year of expansion, in 2017. Our pool of searchable patient records will continue to grow beyond the first major clusters. We are already in the process of making new installations across the world, in Eastern Europe, in Latin America. More will come!

Clinerion has always been about bringing forward the best treatment and care for patients - and this will continue to be our guiding star.

Thank you, again, and please enjoy our little seasonal gift below: a case study reporting on the benefits experienced by users of Clinerion's Patient Recruitment System, in practice.

With best wishes for 2017,

Ulf Claesson
CEO, Clinerion

Pierre Jaccoud
Chairman of the Board, Clinerion

And now the present we promised!

For the first time, we have independently gathered feedback on how Clinerion's PRS benefits hospitals. Some of the findings surprised even us!
